CAREER OBJECTIVE

Final-year Computer Science Engineering student passionate about Artificial Intelligence, Machine Learning, and Software Development. Hands-on experience in Python, SQL, JavaScript, Django, Streamlit, and Large Language Models (LLMs). Strong foundation in Data Structures, Algorithms, DBMS, Object-Oriented Programming, and Machine Learning. Eager to contribute to realworld AI and software development projects while continuously learning emerging technologies.

EDUCATION

Bachelor of Technology, Computer Science and Engineering Swarnandhra College of Engineering and Technology, Narsapur	Aug 2023 - Apr 2027 CGPA 7.08/10
Intermediate, MPC Sri Aditya Junior College, Bhimavaram	Aug 2021 - May 2023 CGPA 8.46/10

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, C
Python Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, Streamlit
CS Fundamentals: DSA, OOP, DBMS, SDLC, Machine Learning, Deep Learning
Web Technologies: HTML5, CSS3, JavaScript, Django, Next.js,
Tools: Git, GitHub, VS Code, Jupyter Notebook, MS Excel, Power BI

INTERNSHIP

Full Stack Development with Python Intern , Datavalley, Virtual Internship	May 2026 – Jul 2026
- Developing a School Management System using Python, Django, HTML, CSS, JavaScript, and SQL with user authentication, CRUD operations, and database integration. - Applying SDLC practices, testing, debugging, and Git/GitHub version control while building a responsive full-stack web application.	
Generative AI with LLMs Intern , SkillDzire, Virtual Internship	May 2026 – June 2026
- Developing an AI-Powered Document Summarizer using Large Language Models (LLMs), Prompt Engineering, and NLP techniques to generate concise and meaningful summaries from lengthy documents. - Applying LLM concepts and API integration to improve response quality and build context-aware AI applications.	

PROJECTS

NightBat AI – AI Study Assistant React.js, Vite, Tailwind CSS, Python, PostgreSQL	GitHub Repo
- Designed and developed an AI-based study platform that processes uploaded documents to generate concise summaries, smart flashcards, and personalized quizzes using Large Language Models (LLMs). - Implemented document processing, prompt engineering, authentication, and AI-powered content generation to help students learn, revise, and test their knowledge from a single platform.	
Student Management System - Python, Streamlit	GitHub Repo
- Developed a student management system that allows users to manage student records, subjects, and marks through an intuitive interface with CRUD operations and persistent JSON-based storage. - Automated student record management by generating class statistics, topper identification, subject-wise performance analysis, and downloadable reports, improving accuracy while reducing manual record management.	
Aqua Market Connect – HTML, CSS, JavaScript	GitHub Repo
- Built a responsive marketplace connecting fish farmers directly with bulk buyers, removing intermediary dependence. - Implemented product listing, search functionality, price & location filtering, order placement, farmer order management, and responsive UI to enable direct buyer–seller transactions.	

CERTIFICATIONS

- The Joy of Computing with Python – NPTEL
- Introduction to MS Excel – Simplilearn
- Power BI for Beginners– Simplilearn
- MongoDB and AI Fundamentals – ICT Academy Learnathon
